MANJARA CHARITABLE TRUST

RAJIV GANDHI INSTITUTE OF TECHNOLOGY, MUMBAI

DEPARTMENT OF MECHANICAL ENGINEERING

SEMESTER : 7
Year : 2019 Div : B

Student Reviews - Institute

The washrooms arent maintained properly at all ! hygiene is a very important aspect of life and it should be given the highest priority. the working student bodies in the institute should be provided with moral and financial support as they represent the institute in various national and international level programs and competitions.

The institute doesnt provide safe drinking water and hygienic restrooms. institute should also support different teams and committees working in the different fields of engineering. the knowledge they gain from those stuff is much more important than the outdated knowledge they are gaining in lecture.

More placements are needed in mechanical engineering.

In practical there is no such lab where we can actually perform the experiments. not a single computer works in labs. no facilities are provided to us hence after paying such a huge amount of fees. no seriousness towards the practical learning. no proper software available. many classrooms and not properly maintained. no proper projector in classes. drinking water is the worst, we have to fill water from outside or purchase from canteen. when we pay such a huge amount so we at least expect to get some basic facilities like proper drinking water, clean toilet, proper classrooms, working computers, cad, cam software, proper maintained practical labs. rest all things are good.

We want better computers for solidworks, ansys, etc. rarely any computer works properly. professors should stop targeting students. watchmen asks for id card at gate thats annoying. why will i go to some other college at 8:30 am in morning. very stupid rule. we expect to have more books in library which are up to date. better placements are required. water filters are bad. washrooms are bad. we need better facility for the amount we pay. overall i will rate college 2/5.

No use of practical session since no pcs is working

Very poor management and attitude toward the student is rud

The pc are not working in the cad/cam lab. there are no softwares installed in the pc which are in working conditions. there is no water in the washroom and cleanliness is not there. students should be motivated other than academic activities as well.

Teaching is only for marks not for knowledge. library persons start book bank at the end of the semester. worst behavior of accounts department sends wrong message about the institute. many times feedback has been taken but there is not improvement in teachers as well as infrastructure of the institute. after visiting nba college administration even remove pen and papers from complaint box. lab pcs are not working .there is not any practical session where we can say its a practical class.

All teachers teach only theory part but no one give the practical example. college never organise industrial visit for the subject like automobile engineering.we have the lack of practical knowledge so college has to look upon these.
