12	15	2	0	0	0	17	97.65%

Overall Average :80.39%

Student Reviews

The sir is very helpful towards the students and understand the daily problems of students also helps to solve them. provides digital notes on google classroom which i personally find very unique and

I liked sirs online assesment system it should be continued, also to complete the vast syllabus class gone little bit fast but it is okay lets try to minimize and make in short the quick revision note

Google classroom initiative is very good initiative by faculty but should give time to a certain topic to let student understand the topic.

Ok

Good

Excellent
